

# 2.4G wireless mouse manual

## Model TSM-5009

This RF wireless & optical mouse uses a newly developed RF wireless technology with 2.4GHz frequency. Specially designed for notebook users, it allows wireless freedom like never before.

## Mouse & Dongle

1. Left button
2. Right button
3. Scroll wheel
4. Battery cover
5. Power button
6. Dongle(Receiver)
7. Sensor
8. Smoother

## Product Features

1. Radio frequency 2409~2476MHz, allows 360 degrees range of motion.
2. Automatic sleep function - The power turns off if left idle for 5 minutes. Thus, it saves power and prolongs battery life.

## Systems Compatibility

Win XP/ Win VISTA/ Win7/Win8

No drivers needed

## **Battery Installation**

1. Uses two AAA alkaline batteries.
2. Press the “Batteries replace button” to open the battery cover. (Please see the reference picture below).
3. Insert the batteries correctly according to the polarity marks on the battery grooves.
4. Push the battery cover forward; when you hear a “click”, the battery cover is locked successfully

## **Dongle Installation**

1. For a notebook computer, insert the receiver in one of the USB ports.
2. For a desktop PC, insert the receiver into a front USB port. If the port is too far from your workspace, use a hub or a USB cable to connect your receiver.

## **Warnings**

1. If you have more than 5 feet between the mouse & receiver, the mouse will not work.
2. Please remove the batteries if the mouse will not be used for an extended period of time.
3. This mouse has an automatic power save mode. Press any button or scroll the wheel to wake the mouse up when in sleep mode.
4. The optical mouse will not work well on glass, any reflective surface or a 3D mouse pad.

**FCC NOTE:**

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS OR CHANGE TO THIS EQUIPMENT. SUCH MODIFICATIONS OR CHANGE COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
